

Be careful of mixed content

Mixed-content happens when:

1. an HTTPS page contains elements (ajax, js, image, video, css ...) served with HTTP
 2. an HTTPS page transfers control to another HTTP page within the same domain
- ⦿ authentication cookie will be sent over HTTP
 - ⦿ Modern browsers block (or warn of) mixed-content

Secure cookie flag

✓ The cookie will be sent over HTTPS exclusively

➡ Prevents authentication cookie from leaking in case of mixed-content
