

Do your own risk analysis

# How important is your data

- on your laptop?
- on your phone?
- on internet?

# What if someone

- steals them?
- distributes them?
- deletes them?

**What if the system is not working well?**

# Do you own risk analysis

## **How important is your data**

- on your laptop?
- on your phone?
- on internet?

## **What if someone**

- steals them?
- distributes them?
- deletes them?

## **What if the system is down or not working well?**

# Let's do the risk assessment of your digital self

- As a UofT student
- As the founder of a startup
- As a public figure
- As a political leader
