

Course Objectives

CSCD27 is an undergraduate course that provides **a theoretical and technical overview** of the field of computer security

Learning goals

1. Acquire a **good understanding of basic concepts** such as
 - Applied cryptography
 - Network security
 - Software security
 - Human security
2. Acquire a **methodology to design and analyze the security of critical systems**
3. Acquire a **good practice to stay up-to-date** with the field
