## Definitions

### Cryptographic algorithm

The method to do encryption and decryption.

#### Cryptographic key

An input variable used by the algorithm for the transformation

# N-bit security entropy (a.k.a. the key space)

The number of bits necessary to encode the number of possible keys (could be different than the key length)

### Monoalphabetic cipher

A specific letter in the plaintext is consistently substituted with another letter in the cipher text

### Definitions

#### **Polyalphabetic Cipher**

A specific letter in the plaintext may be substituted with different letters in the cipher text

#### Cryptography

The art and science of securing messages

#### Cryptanalysis

The art and science of breaking secured messages to reveal the hidden message

#### Cryptography

The art and science of secure messaging which encompasses cryptography and cryptanalysis
